Strategic Report

BAE Systems (Operations) Limited (the Company) consists of the majority of the BAE Systems Group's Air sector (primarily US Programmes, European and International, and Saudi Arabian businesses), the Group's Electronic Systems business based in Rochester, UK, and elements of the Group's UK Shared Services business.

Review of business

Operational performance and COVID-19 impact

The COVID-19 pandemic affected all markets and countries in the Company, with the priority throughout the delivery of customer-critical activity whilst ensuring the safety and wellbeing of employees. Swift enactment of business continuity plans enabled safe systems of work to be developed and significant mitigation against the adverse financial effects of the pandemic, ensuring continuity of cash flow both from customers and into the supply chain.

Operations have been stable across the Company's main markets with a significant number of employees continuing to work from home. Where roles cannot be performed at home, employees continued to work at BAE Systems sites and customer locations, including Air Force bases, where the Company collaborated closely to ensure a safe system of work. The business has continued to adapt and enhance its protective measures, in particular with the emergence of second and third waves of the pandemic in the UK and with a number of sites being located in areas with high rates of infection. Nonetheless, key outputs have been maintained and the productivity of remote working has continued to improve via enhancements to IT infrastructure and tools. Safe systems of work continue to be adapted to the local situation as required.

In Saudi Arabia, COVID-19 levels have reduced significantly over the last six months and the Saudi government has partially lifted the international air, land and sea border restrictions. This change has come as a welcome relief to employees and dependants alike. Operations returned to a normal level of activity in the last quarter of the year.

Across all markets, the Company continues to work closely with its supply chain to manage any impacts from the COVID-19 pandemic and the downturn in the commercial aircraft market. Where suppliers have schedule or liquidity risk, mitigating actions have been implemented, as well as looking at dual source opportunities.

European and International Markets

The Company secured an order in excess of £1.2bn to support the production of a further 38 aircraft for the German Air Force to replace its original Typhoon Batch 1 aircraft.

Activity on the 24 Typhoon and nine Hawk aircraft and associated support and training contract for the Government of the State of Qatar progresses well, with all milestones achieved in the year.

Seven deliveries of major units under the Kuwait Typhoon contract, secured by Italian Eurofighter partner Leonardo, occurred in the period, with the remainder planned by 2022.

The final Tranche 3 Typhoon aircraft was delivered to Italy in October.

The UK Typhoon fleet continues to achieve the contracted flying hours, under its ten-year partnership arrangement. BAE Systems continues to support the European Partner Nations' own support arrangements.

Support to the Royal Air Force's UK fleet of Hawk fast jet trainer aircraft continues, with an interim extension to the availability contract received. We remain in discussions concerning the follow-on arrangement to support the Royal Air Force's UK fleet of Hawk fast jet trainer aircraft through a long-term availability contract.

The future electronically scanned European Common Radar Solution is progressing with initial entry into service contracted on Kuwait and Qatar aircraft. German and Spanish Air Forces have awarded contracts to enhance the capability of their in-service aircraft by upgrading some of their fleet with the new electronically scanned radar standard. The UK continues to fund activity for the future UK standard of weapon system and sensors.

The next phase of the Tempest technology maturation programme is progressing well. The UK, Swedish and Italian governments are engaged to develop the next-generation combat air capability.

The Company continues to invest in promising new and innovative technologies for the future. The PHASA-35® solar-electric powered unmanned aircraft successfully completed its maiden flight in February, and completed 72 hours of continuous ground testing including communications payload. Discussions with a range of customers continue in the development of this technology and a range of services.

US Programmes

The production of F-35 rear fuselage assemblies will ramp up to full rate in 2021. In the year, 126 rear fuselage assembles were completed on the production contracts across Lots 11 to 14, falling below the contracted level as a result of the COVID-19 disruption. Contract negotiations for Lots 15 to 17 have commenced during the second half of the year and are likely to conclude during 2021.

The Company continues to support the Royal Navy and Royal Air Force in integrating the F-35 aircraft into its operational fleet and forward deployments, and continues to play a significant role on the F-35 sustainment programme including the supply of spares and technical support, software products, upgrades and specialist workforce services.

Saudi Arabia

The Company continues to address current and potential new requirements as part of long-standing agreements between the UK government and the Saudi Arabian government as it continues to work on the localisation of defence capabilities, in support of the Kingdom's National Transformation Plan and Vision 2030.

The Company is reliant on the continued approval of export licences by a number of governments in order to continue supplies to the Kingdom of Saudi Arabia. Following extensions granted by the German government to a number of export licences on joint collaborative programmes, the Company is working closely with industry partners and the UK government to continue to fulfil the contractual support arrangements in Saudi Arabia on the key European collaboration programmes. The Company continues to perform on the contract secured in 2018 to provide Typhoon support services to the Royal Saudi Air Force through to 2022. Through this contract, the business also supports the Industrialisation of Defence capabilities in Saudi Arabia.

The Saudi British Defence Co-operation Programme five-year funding agreement through to 2021 comprises a number of contracts, including support to the Tornado fleet and provision of training for the Royal Saudi Air Force, as well as engineering and logistics services for the Royal Saudi Naval Forces. While the Company continues to meet the key contractual obligations under these contracts, there has been some disruption because of the COVID-19 pandemic.

A total of 12 Hawk aircraft assembled in-Kingdom have now been completed and entered service with the Royal Saudi Air Force, including six in the year. The Company has delivered all 22 major units to meet this final assembly programme.

Key performance indicators

Key financial performance indicators are shown below:

	2020	2019
	£	£
Order intake	4.6bn	3.2bn
Revenue	6.1bn	5.6bn
Operating profit	. 468m	316m

Order intake represents funded orders received from customers in the year. The increase in order intake is primarily due to the Company's share of the German Typhoon award.

Revenue represents the income derived from the provision of goods and services. The increase in revenue is driven by activity on the F-35 and Typhoon, as well as the ramp up in production on the Qatar Typhoon and Hawk programmes.

Operating profit represents profit for the year before income from subsidiary undertakings and participating interests, net finance costs and taxation expense. The increase in operating profit is as a result of the ramp up in operations across key programmes.

Principal risks

The Company's principal risks are identified below.

The outbreak of contagious diseases may have a material adverse effect on the Company's business, financial condition and results of operations.

Contagious diseases can have an adverse effect on the Company's business, financial condition and results of operations. While the Company is liaising closely with its customers and suppliers to understand any changes in requirements and priorities during this time, the uncertainties surrounding the development of this pandemic make it difficult to predict the extent to which the Company may be affected.

Areas of the Company's business that could be impacted include a decrease in spending by the Company's major defence and commercial customers; an increase in taxation by governments; the failure to obtain awards for defence and commercial contracts; the failure of suppliers to deliver parts to the Company; the requirement for the Company or its suppliers to reduce site operational levels or close sites; the inability of the Company to meet contractual delivery requirements on time; the inability to adequately staff and manage the business; and an increase in the cost or lack of availability of funding. If the Company were unable to obtain appropriate funding, it could be forced to make reductions in spending, seek to extend payment terms with suppliers and/or suspend or curtail planned programmes. Any of the above could have a material adverse effect on the Company's business, financial condition and results of operations.

Since the outbreak of the COVID-19 coronavirus pandemic, the Company has taken a number of responsive measures including reducing site operational levels and introducing new cleaning regimes, safe working distance measures and protective equipment for its employees. A significant proportion of the Company's employees are working from home.

By taking these measured actions to build in resilience for a prolonged period of disruption, the Company has continued to deliver critical work for its customers and, where operations were impacted, ensured that site-critical workers have now been able to safely return to work where possible.

Support for the defence industry from the governments in the Company's key markets has been strong around prioritisation of capabilities, cash flows, recognising the need to maintain a strong supply chain and working collaboratively to maintain critical defence and security programmes.

The Company operates in international markets.

The Company conducts business in a number of regions, including the Middle East.

The risks of operating in some countries include: social and political changes impacting the business environment; economic downturns, political instability and civil disturbances; the imposition of restraints on the movement of capital; the introduction of taxes or tariffs; change of export control and other government policy and regulations in the UK and all other relevant jurisdictions; and the inability to obtain or maintain the necessary export licences.

The Company is exposed to volatility in currency exchange rates, particularly in respect of the Saudi riyal, US dollar and the Euro. There has been volatility in currency exchange rates in the period since the EU referendum in the UK and due to the impact of the COVID-19 pandemic on the global economy. BAE Systems Group policy is to hedge all material firm transactional currency exchange rate exposures, which the Company adheres to.

While the terms of the UK's relationship with the EU after the end of the transition phase on 31 December 2020 have now been clarified by the entry by the UK and the EU into the Trade and Cooperation Agreement, the UK is now a third country for the purposes of EU-funded defence projects. There remains the risk that, as a result of the UK leaving the EU, the Group's ability to take part in new European collaborative defence programmes, whether under such EU-funded projects or otherwise, could be hampered. If the UK is excluded from new European collaborative defence programmes, this could impact the Company's future results and financial condition.

The Company benefits from a large order backlog with established positions on long-term programmes and there is relatively limited UK-EU trading. The Company has key roles in major ongoing European programmes, such as Eurofighter, which are only likely to be marginally affected by Brexit. The Company will support the UK government in achieving its aim to ensure that the UK maintains its key role in European security and defence in the post-Brexit environment, and to strengthen bilateral relationships with key partners in Europe. This will be important for ongoing collaboration with such partners in Europe on the development of defence capabilities.

The Company is dependent on defence spending.

The Company's core businesses are primarily defence-related, selling products and services directly and indirectly, mainly to governments.

Defence spending by governments can fluctuate depending on change of government policy, other political considerations, budgetary constraints, specific threats and movements in the international oil price.

There have been constraints on government expenditure in a number of the Company's principal markets. Defence spending by governments has also been impacted by the COVID-19 outbreak due to reprioritisation of funds.

The Company's business is subject to significant competition in international markets.

The Company's business plan is targeting an increasing level of business in international export markets.

With constraints on defence spending in the UK, the Company's business and future results may be adversely impacted if it is unable to compete adequately and obtain new business in international markets.

The Company's largest customers are governments.

The Company has long-standing relationships and security arrangements with a number of its government customers, including the governments of the UK and Saudi Arabia, and their agencies. It is important that these relationships and arrangements are maintained.

In the defence and security industries, governments can typically modify contracts for their convenience or terminate them at short notice. The risk of modification, termination or cancellation of government contracts has recently increased due to the reprioritisation of government funds as a result of the outbreak of the COVID-19 pandemic. Governments also from time to time review their terms of trade and underlying policies and seek to impose such new terms and policies when entering into new contracts.

The Company's performance on its contracts with some government customers is subject to financial audits and other reviews which can result in adjustments to prices and costs.

The Company is dependent on the award timing and cash profile of its contracts.

The Company's profits and cash flows are dependent, to a significant extent, on the timing of, or failure to receive, award of defence contracts and the profile of cash receipts on its contracts. The timing of cash receipts could be impacted by the reprioritisation of government funds as a result of the outbreak of the COVID-19 pandemic.

The Company has many contracts, including a small number of large contracts and fixed-price contracts.

A significant portion of the Company's revenue is derived from fixed-price contracts. Actual costs may exceed the projected costs on which the fixed prices are agreed and, since these contracts can extend over many years, it can be difficult to predict the ultimate costs.

It is important that the Company maintains a culture in which it delivers on its projects within tight tolerances of quality, time and cost performance in a reliable, predictable and repeatable manner.

The defined benefit pension schemes in which the Company participates have aggregate funding deficits.

In aggregate, there is an actuarial deficit between the value of the projected liabilities of the defined benefit pension schemes in which the Company participates and the assets they hold.

The funding deficits may be adversely affected by changes in a number of factors, including investment returns and members' anticipated longevity.

The Company could be negatively impacted by information technology security threats.

The security threats faced by the Company include threats to its information technology infrastructure, unlawful attempts to gain access to its proprietary or classified information and the potential for business disruptions associated with information technology failures.

The Company is subject to risk from a failure to comply with laws and regulations.

The Company operates in a highly-regulated environment across a number of jurisdictions and is subject, without limitation, to regulations relating to import-export controls, money laundering, false accounting, anti-bribery and anti-boycott provisions. It is important that the Company maintains a culture in which it focuses on embedding responsible business behaviours and that all employees act in accordance with the requirements of the Company's policies, including the Code of Conduct, at all times.

Export restrictions could become more stringent and political factors or changing international circumstances could result in the Company being unable to obtain or maintain necessary export licences.

The Company's strategy is dependent on its ability to recruit and retain people with appropriate talent and skills.

The Company's business plan is dependent on its ability to compete to recruit and retain people with appropriate talent and skills, including those with innovative technological capabilities.

The Company's business plan is targeting an increasing level of business in international export markets outside the UK. It is important that the Company recruits and retains management with the necessary international skills and experience in the relevant jurisdictions.

The Company may be impacted by environmental factors, including those relating to climate change.

The Company is subject to comprehensive environmental laws and regulations in each of the countries in which it operates, including those relating to the impacts of climate change. Such laws and regulations impose standards with respect to air emissions, wastewater discharges, the use, handling and storage of hazardous wastes and materials, remediation of soil and groundwater contamination and the prevention of pollution. They can also include energy-related taxes and the increased costs of compliance with energy-related schemes. The Company may also be impacted by environmental factors, including those arising from climate change, such as scarcity of water and other resources as well as extreme weather events such as, for example, flooding and storms.

Environmental factors, including those relating to climate change, have the potential to materially impact the Company's business and operations. Increasing changes in environmental laws and regulations can expose the Company to increasing capital and operating costs associated with compliance, remediation and protection of the environment. Breaches of such laws and regulations can result in substantial costs, including fines, penalties or other sanctions, investigations and clean-up costs, and third-party claims for property damage or personal injury as well as the termination of permits.

Section 172(1) statement

This statement contains an overview of how the Directors have performed their duty to promote the success of the Company as set out in section 172(1) of the UK's Companies Act 2006. That section requires a Director of a company to act in the way he considers, in good faith, would most likely promote the success of the company for the benefit of its shareholders. In doing this, the Director must have regard, amongst other matters, to:

- a) the likely consequences of any decision in the long term,
- b) the interests of the Company's employees,
- c) the need to foster the Company's business relationships with suppliers, customers and others,
- d) the impact of the Company's operations on the community and the environment,
- e) the desirability of the Company maintaining a reputation for high standards of business conduct, and
- f) the need to act fairly as between members of the Company.

Decision Making

The Operational Framework sets out the principles of good governance to which BAE Systems Group subsidiaries are required to adhere, together with BAE Systems Group's values, policies and processes. Decisions affecting a subsidiary are required to be taken in line with the Operational Framework, including in accordance with applicable delegations of authority.

Pursuant to the Operational Framework, BAE Systems' businesses each produce a strategic plan, a financial forecast for the current year and financial projections for the next five years. The Directors of the Company contribute towards this process for the respective businesses of the Company for which they are responsible and are also responsible for identifying and managing principal and emerging risks in such businesses. In so doing the Directors have regard to a variety of matters including the interests of various stakeholders, the consequences of their decisions in the long term and the long-term reputation of the Company and its businesses.

During the year, the Directors of the Company approved bids and contracts for the businesses for which they are responsible and in so doing, in accordance with BAE Systems Group policies and processes, had regard to a number of matters including the business case and financial returns, technical and programme management matters, risk management, workforce matters and the long term reputation of the Company.

Employees

Employee engagement is a primary focus for the Directors of the Company – connecting employees to the Company's and the BAE Systems Group's strategy and purpose, empowering them to contribute to improving business performance and creating an environment in which everyone can fulfil their potential. As well as keeping the Company's employees informed about what is happening across the BAE Systems Group through the Group's intranet and email, podcasts, newsletters, and leadership blogs and briefings, the Directors place significant focus on engaging and consulting with our employees and their Trade Union/employee representative groups.

In 2020, in light of the COVID-19 pandemic, the principal focus for the Directors of the Company was the health and wellbeing of its employees. Working alongside our Trade Unions and employee representatives, we introduced a number of measures to return employees safely back to work where their role could not be carried on from home. To assist home-working, we developed guides to support employees in maintaining their safety, security, wellbeing and productivity whilst working effectively from home. The Directors were pleased to see the rapid deployment of various means of communication across the Company. These included the enhanced roll-out of an employee app, which allowed us to update employees directly and immediately through their personal devices and receive feedback from them. Other notable examples in 2020 of employee engagement included closure of the rationalisation programme at Warton and at Brough including ending the arrangement on pensions augmentation.

These engagement activities form part of the Company's implementation of the BAE Systems Group-wide employee processes and policies which are described on pages 30-31, 43-47, 100-101 and 116-117 of BAE Systems plc's Annual Report 2020 (available at: www.baesystems.com/investors). Pursuant to the Group's People Policy, Directors and employees are required to contribute to creating an engaged and inclusive work environment where individuals are respected and where the value of a diverse workforce is recognised. Also, pursuant to the Policy, employees are to be provided with the means to give their views and feedback.

Through the implementation by the Company of these processes and policies, the Directors have regard to the interests of the Company's employees.

Fostering business relationships with suppliers, customers and others

The Directors recognise that fostering business relationships with key stakeholders, such as customers and suppliers, is essential to the Company's success. The Company has close relationships with its customers, suppliers and industry partners which help us to create best-in-class, cost-effective equipment, goods, services and solutions.

The Company's largest customers are governments and it also sells to large prime contractors. Strong and collaborative relationships with the Company's principal government customers helps the Company to identify its customers' requirements and to help position the Company as a trusted provider. The Managing Director of the main business of the Company, who is a Director of the Company, is in regular contact with the principal government customers of the Company, in particular the governments of the United Kingdom, Saudi Arabia, Qatar and the US.

The Company, together with its procurement and supply chain function, works with its suppliers and their supply chains to provide equipment, goods and services that meet its customers' requirements. The Company's supplier relationships are often long-term due to the length of the product life-cycles and the relevant Directors meet with key suppliers and work with the BAE Systems Group's procurement function to develop deeper relationships with business in the supply chain and develop strategic relationships with key suppliers. In particular, during 2020, in light of the COVID-19 pandemic, a priority of the Directors of the Company was to support the Company's customers and suppliers.

Through providing safe on-site working environments and scaled-up home working capabilities, we continued to deliver critical work for our customers...

We co-ordinated closely with our supply chains to mitigate disruptions where possible and maintain resilience. Maintaining cash flow through the supply chain was critical to the wellbeing of many companies within our supply chain that had to cope with hugely challenging trading conditions. Through excellent support from our Government customer, we were able to continue payments to suppliers.

The community and the environment

The Directors recognise the importance of leading a company that not only generates value for shareholders but also contributes to wider society. Through the Operational Framework the Company implements the requirements of the BAE Systems Group's Community Investment Policy, which looks to ensure that the Company builds and nurtures mutually beneficial relationships between its business, its people and local stakeholders. Giving back to the communities in which the Company operates, and to charities that have meaning to its business, is vitally important to the Company and its employees, allowing the Company to make a positive difference and have an impact where it counts. In particular, the Company is a major employer in Warton and Samlesbury, Lancashire (UK), and the Directors recognise the significance of the Company in the local community.

In light of the COVID-19 Pandemic, the Company assisted the Group in supporting communities in the UK through deploying 3D printing capability and collaborating to donate personal protective equipment to the NHS, and by supporting ventilator production as part of the *VentilatorChallengeUK* consortium.

The Company also continued to work with Lancashire County Council and the Local Enterprise Partnership to develop the Samlesbury Enterprise Zone with the aim of creating an aerospace and technology hub. In Saudi Arabia and the UK, BAE Systems Group education ambassadors have offered their time to encourage school-age children to pursue STEM subjects and careers.

As a manufacturer, the Company recognises that its operations have an impact on the environment – from the energy and resources it uses, to the products it manufactures and the waste that it generates. As an organisation, the BAE Systems Group is committed to reducing the environmental impact of its operations and products, minimising its environmental footprint and, in turn, decreasing its operational costs. Through the Operational Framework the Company implements the requirements of the BAE Systems Group's Environmental Policy, which details the Group's commitment to high standards of environmental management. In particular, the Company is supporting the Group's target of achieving net zero greenhouse gas emissions across the Group's operations (scope 1 and 2) by 2030 and its target of working towards a net zero value chain by 2050.

All of the above activities form part of the Company's implementation of the BAE Systems Group-wide community and environment processes and policies and the BAE Systems Group's impacts thereon which are described in the "Environment" and "Social" sections (pages 36 to 39 and 42 to 52 respectively) of BAE Systems plc's Annual Report 2020 (available at: www.baesystems.com/investors).

Maintaining a reputation for high standards of business conduct

The BAE Systems Group aims to be a recognised leader in business conduct which helps it to earn and maintain stakeholder trust and sustain business success. The Directors consider it fundamental to maintain a culture focused on embedding responsible business behaviours. All employees of the Company are expected to act in accordance with the requirements of BAE Systems Group policies, including the Code of Conduct, at all times. As well as being the right thing to do, this reduces the risk of compliance failure and supports the business in attracting and retaining high-calibre employees.

Detailed information on the BAE Systems Group-wide business conduct processes and policies are described in BAE Systems plc's Annual Report 2020 (available at: www.baesystems.com/investors) and in particular the "Governance and business conduct" section on page 53-55.

Approved by the Board and signed on its behalf by:

B W lerland

Director

28 June 2021

Directors' Report

Company registration

BAE Systems (Operations) Limited is a private company, limited by shares and registered in England and Wales with the registered number 01996687.

Results and dividends

The Company's profit for the financial year is £311m (2019 £268m).

The Directors propose a dividend for 2020 of £310m (2019 £nil).

Looking forward

Future Typhoon production and support sales are underpinned by existing contracts. Discussions continue in relation to potential further contract awards for Typhoon, which would extend current production revenues. Production of rear fuselage assemblies for the F-35 will increase in 2021 and is expected to be sustained at these levels. The business plays a significant role in the F-35 sustainment programme in support of Lockheed Martin, and revenues are set to grow as the number of aircraft deployed increases over the coming years. Defence and security remains a priority for the UK government. The UK Combat Air Strategy provides the base to enable long-term planning and investment in a key strategic part of the business.

In order to provide ongoing capability to international customers, the Group is reliant on the continued approval of export licences by a number of governments. The withholding of such export licences may have an adverse effect on the Group's provision of capability to the Kingdom of Saudi Arabia and the Group will seek to work closely with the UK government to manage the impact of any such occurrence.

In the UK, the publication of the Defence Command Paper was positive for the Company with renewed commitments to our major long-term programmes in combat aircraft design and build, allowing for long-term investment in these key sovereign capabilities,

Since 31 December 2019, the Company has been affected by the COVID-19 pandemic (see Principal Risk entitled "The outbreak of contagious diseases may have a material adverse effect on the Company's business, financial condition and results of operations" on page 5). The current immunisation programme is progressing and the business of the Company has returned to a near normal operational tempo. However, it is not clear for how long this pandemic will last or how much more extensive it will become, or the further measures that will be taken by governments and others to seek to control the virus.

The impact of Brexit on the Company is expected to be limited. The Company has relatively limited UK-EU trading and the majority of persons employed in the Company are UK nationals, with only limited movement of EU nationals into and out of the Company. The Company has been working with its supply chain throughout the Brexit process to mitigate any major disruptions.

Going concern

After making due enquiries, the Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for at least 12 months from the date of approval of the Financial Statements.

The Company and its ultimate parent entity BAE Systems plc continue to conduct ongoing risk assessments in relation to their business operations and liquidity, including in relation to the potential future impact of the COVID-19 pandemic.

Having undertaken these assessments, the Directors consider that the Company will be able to continue in operational existence for the foreseeable future. For this reason they continue to adopt the going concern basis in preparing the Financial Statements.

Overseas offices

The Company has an overseas project office in India and a branch office in Qatar.

Employees

The Company is committed to giving full and fair consideration to applications for employment from disabled people who meet the requirements for roles, and making available training opportunities and appropriate accommodation to disabled people employed by the Company. In the event of members of staff becoming disabled every effort is made to ensure that their employment with the Company continues and that appropriate training is arranged.

Employee engagement enables our employees to contribute to improving business performance and helps us to gauge our performance in creating an environment in which everyone can fulfil their potential. Engagement with UK employees has been considered on page 8 of the Strategic Report.

The Company welcomes employees becoming shareholders in BAE Systems plc, the Company's ultimate parent company, and BAE Systems plc offers employee share plans to support this.

Research and development

The Company is focused on technology innovation and engineering excellence, investing in next-generation research and development programmes to deliver competitive solutions to meet our current and future customers' needs. Total research and development expenditure in the year was £475m (2019 £379m), of which £140m (2019 £98m) was funded by the Company.

Energy and Carbon Reporting exemption

The Company has taken advantage of the exemption granted under The Companies Act (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018 as this information is disclosed in the annual report of its ultimate parent, BAE Systems plc on pages 36-39.

Financial instruments

The international nature of the Company's business means it is exposed to volatility in currency exchange rates. In order to protect itself against currency fluctuations, the Company's policy is to hedge all material firm transactional exposures.

Qualifying Indemnity Provisions

The Directors of BAE Systems Pension Funds Trustees Limited, BAE Systems 2000 Pension Plan Trustees Limited and BAE Systems Executive Pension Scheme Trustees Limited benefit from indemnities in the governing documentation of the BAE Systems Pension Scheme, the BAE Systems 2000 Pension Plan and the BAE Systems Executive Pension Scheme, respectively, given by the Company, which are qualifying indemnity provisions for the purpose of the Companies Act 2006. All such indemnity provisions are in force at the date of this Directors' Report.

Engagement with suppliers, customers and others

Engagement with suppliers, customers and others has been considered on page 9 of the Strategic Report.

Corporate governance statement

BAE Systems plc, the ultimate parent company of the Company, adheres to the UK Corporate Governance Code. The UK Corporate Governance Code's principles are embedded in the BAE Systems Group Operational Framework, which sets out the principles of good governance and encapsulates the BAE Systems Group's values, policies and processes. Each company in the BAE Systems Group is required to adhere to the Operational Framework, which enables the Group to deliver operational excellence in a clear, accountable and consistent way.

The policies and processes in the Operational Framework are enacted at a local level by each of the businesses in the BAE Systems Group. The Operational Framework is underpinned by an Operational Assurance Statement which is a six-monthly process used to monitor compliance with the Operational Framework and policies.

Accordingly, the Company has not applied any separate corporate governance code for the financial year as it believes the corporate arrangements described in this statement are appropriate for the Company.

Set out below is a summary of how principles of good corporate governance, as set out in the Operational Framework, apply to the Company:

Corporate governance statement (continued)

Purpose, strategy, values and culture

The BAE Systems Group has a strategic framework that sets out the Group's vision, mission and strategy and sets out three strategic priorities which are embedded throughout each business in the Group. This provides the link between the Group's long-term strategy and the near-term business objectives for all employees in the Company. The Company's businesses produce a strategic plan, a financial forecast for the current year and financial projections for the next five years, aligning resources with the delivery of forecast financial performance and the BAE Systems Group's strategic objectives. In so doing the Directors have regard to a variety of matters including the interests of various stakeholders, the consequences of their decisions in the long term and the long-term reputation of the Company and its businesses.

The BAE Systems Group's strategy is supported by the Group's values of trusted, innovative and bold. The Group has a Code of Conduct which lays out the standards that are expected of each employee in the Company, to support the employees in doing the right thing. All employees in the Company receive annual training designed to stimulate conversations about ethical decision making.

Board and Directors' accountability

The Directors of the Company are responsible for ensuring local policies, processes and charters are in place in the businesses of the Company to implement the requirements of the Operational Framework and for ensuring those requirements are met.

Those requirements ensure that internal controls are in place that are designed to provide effective and measurable management of operational risk and performance, in line with BAE Systems Group requirements. These controls provide assurance regarding:

- the reliability and integrity of information
- · compliance with policies, processes, laws, regulations and contracts
- the safeguarding of assets and protection against fraud, and
- the economical and efficient use of resources.

The requirements also regulate how the BAE Systems Group expects the employees of the businesses of the Company to be managed and the obligations placed on all employees concerning avoiding conflicts of interest, anti-bribery, and managing the security of employees, information and other assets.

As part of a robust system of internal controls, the authority of the Managing Director of the business of the Company is subject to financial limits and other restrictions, above which matters must be referred upwards and ultimately to the Board of BAE Systems plc.

Risk

Responsibility for identifying, analysing, evaluating and managing principal and emerging risks in the business lies with the Managing Directors of the businesses of the Company. They are also responsible for reporting and monitoring key risks in accordance with established processes under the BAE Systems Group's Operational Framework.

The BAE Systems Group's risk management process is set out in the Risk Management Policy, a mandated policy under the Operational Framework, and, in respect of projects, in the Lifecycle Management Framework, a core business process under the Operational Framework. The Lifecycle Management Policy sets out how the Company must plan and manage the execution of projects above a certain minimum level, providing decision gate reviews at key stages from initial opportunity to final closure.

Further guidance is provided by a Risk Management Maturity self-assessment tool. Identified risks are documented in risk registers showing: the risks that have been identified; characteristics of the risk; the basis for determining mitigation strategy; and what reviews and monitoring are necessary. Each risk is allocated an owner who has authority and responsibility for assessing and managing it.

The Board of BAE Systems plc has overall responsibility for determining the nature and extent of the risk the BAE Systems Group is willing to take and ensuring that risks are managed effectively across the Group.

Remuneration

The BAE Systems Group's Performance Leadership framework is a core business process designed to support the development of a diverse and inclusive culture that delivers the Group's strategy. The framework provides a principled approach to performance, assessment, development and reward for employees and is required to be implemented within the business of the Company.

Corporate governance statement (continued)

Stakeholders

As regards employees, the Operational Framework includes a People Policy, pursuant to which the Directors and employees are required to contribute to creating an engaged and inclusive work environment, where individuals are respected and where the value of a diverse workforce is recognised. Pursuant to the policy, employees are also to be provided with the means to give their views and feedback, and for the feedback to be responded to appropriately.

As regards customers, the Operational Framework makes it a priority of each business to understand their customers' evolving needs and expectations, and deliver on their commitments throughout the life of the business's products and services, The Operational Framework requires businesses to measure the delivery of such customer focus through reviews with customers and measurement of schedule adherence.

As regards suppliers, the BAE Systems Group's policy is to identify and select suppliers which meet the Group's standards. The businesses manage risk with their suppliers in accordance with the BAE Systems Group's Procurement Policy, Lifecycle Management Framework and Supplier Principles. The Managing Directors of the businesses of the Company are required to oversee compliance with these policies and principles for the businesses for which they are responsible.

The BAE Systems Group's Environmental Policy outlines the Group's commitment to improving standards of environmental management, and compliance with the Policy is directed by environmental teams across the Group.

Pursuant to the BAE Systems Group's Community Investment Policy, the Global Community Investment Strategy aims to build and nurture mutually beneficial relationships between the Group's businesses and local stakeholders, including employee involvement in charitable activities and donations to local, national and international charities.

Directors and their interests

The Directors who served throughout the year and up to the date of this Report unless otherwise stated, were as follows:

Mr B W lerland

Mr P J Lynas (resigned 31 March 2020)

Mr P R Earl (resigned 15 May 2020)

Mr C G Boardman

Ms A J Thompson (appointed 14 May 2020)

Mr T Fillingham (appointed 14 May 2020)

Mr M Taylor (appointed 14 May 2020)

The Board is not aware of any contract of significance in relation to the Company in which any Director has, or has had, a material interest.

Disclosure of information to auditor

The Directors who held office at the date of approval of this Directors' Report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware, and each Director has taken all the steps that he ought to have taken to make himself aware of any relevant audit information and to establish that the Company's auditor is aware of that information. This confirmation is given and should be interpreted in accordance with the provisions of Section 418 of the Companies Act 2006.

Auditor

The auditor, Deloitte LLP, has indicated its willingness to continue in office and, in accordance with Section 487(2) of the Companies Act 2006, has been re-appointed.

Approved by the Board and signed on its behalf by:

B W lerland Director

Directors' Responsibilities Statement

The Directors are responsible for preparing the Directors' Report and the Financial Statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare Financial Statements for each financial year. Under that law the Directors have elected to prepare the Financial Statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law), including Financial Reporting Standard 101 (FRS 101) Reduced Disclosure Framework. Under company law the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- · make judgements and estimates that are reasonable and prudent;
- state whether applicable UK accounting standards have been followed, subject to any material departures disclosed
 and explained in the Financial Statements; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the Financial Statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Independent Auditor's Report to the Members of BAE Systems (Operations) Limited

Report on the audit of the Financial Statements

Opinion

In our opinion the Financial Statements of BAE Systems (Operations) Limited (the Company):

- give a true and fair view of the state of the Company's affairs as at 31 December 2020 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 "Reduced Disclosure Framework"; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the Financial Statements which comprise:

- the Income Statement;
- · the Statement of Comprehensive Income;
- the Balance Sheet;
- · the Statement of Changes in Equity; and
- the related notes 1 to 28.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 "Reduced Disclosure Framework" (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the Financial Statements section of our report.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the Financial Statements in the UK, including the Financial Reporting Council's (the FRC's) Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the company's ability to continue to adopt the going concern basis of accounting included:

- understanding the cash position of the company and the extent to which the company is reliant on Group support for liquidity purposes;
- testing the accuracy of management's models, including agreement to the most recent approved budgets and forecasts which included the impact of COVID-19 and Brexit;
- challenging the key assumptions of these forecasts by assessing analyst reports/industry data and other
 external information, comparing forecast revenue with the company's order book and historical performance,
 evaluating the historical accuracy of forecasts prepared by management, and assessing the sensitivity of
 these forecasts;
- assessing the sufficiency of the company's disclosure surrounding the going concern basis.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Independent Auditor's Report to the Members of BAE Systems (Operations) Limited (continued)

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of Directors

As explained more fully in the Directors' Responsibilities Statement, the Directors are responsible for the preparation of the Financial Statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

A further description of our responsibilities for the audit of the Financial Statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

We identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and then design and perform audit procedures responsive to those risks, including obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion.

We considered the nature of the company's industry and its control environment, and reviewed the company's documentation of their policies and procedures relating to fraud and compliance with laws and regulations. We also enquired of management about their own identification and assessment of the risks of irregularities.

We obtained an understanding of the legal and regulatory framework that the company operates in, and identified the key laws and regulations that:

- had a direct effect on the determination of material amounts and disclosures in the financial statements, which
 included the UK Companies Act, pension legislation and taxation legislation; and
- do not have a direct effect on the financial statements, but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty, including in respect of export controls, defence contracting and anti-bribery and corruption legislation.

We discussed among the audit engagement team regarding the opportunities and incentives that may exist within the organisation for fraud and how and where fraud might occur in the financial statements.

Independent Auditor's Report to the Members of BAE Systems (Operations) Limited (continued)

Extent to which the audit was considered capable of detecting irregularities, including fraud (continued)
As a result of performing the above, we identified the area with the greatest potential risk of fraud to be in relation to revenue and margin recognition on long term contracts. The specific procedures we performed to respond to this risk included:

- examining external evidence to support contract status and estimation of variable consideration (including associated recoverability of contract balances), such as customer correspondence and for certain contracts meeting with the customer directly; and
- analysing historical contract performance and testing the underlying calculations used in contract assessments for accuracy and completeness including assumptions made regarding COVID-19.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any significant transactions that are unusual or outside the normal course of business.

In addition to the above, our procedures to respond to the risks identified included the following:

- reviewing financial statement disclosures by testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- enquiring of management and concerning actual and potential litigation and claims, and instances of noncompliance with laws and regulations; and understanding the impact of COVID-19 and remote working on the nature and operation of controls, to inform our risk assessment and conclusions on their effectiveness; and
- reading minutes of meetings of those charged with governance, reviewing internal audit reports and reviewing correspondence with relevant regulatory authorities.

We have not identified any irregularities or detected any indications of fraud to report through the procedures performed.

Report on other legal and regulatory requirements

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and the Directors' Report for the financial year for which the Financial Statements are prepared is consistent with the Financial Statements; and
- the Strategic Report and the Directors' Report have been prepared in accordance with applicable legal requirements

In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Strategic Report or the Directors' Report.

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the Financial Statements are not in agreement with the accounting records and returns; or
- · certain disclosures of Directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in respect of these matters.

Independent Auditor's Report to the Members of BAE Systems (Operations) Limited (continued)

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

1 Accounting policies

BAE Systems (Operations) Limited (the Company) is a private company, limited by shares, and registered in England and Wales and incorporated in the United Kingdom. Its ultimate controlling party is BAE Systems plc. The address of the Company's registered office is shown on page 15. The principal activities of the Company are described in the Strategic Report on page 3.

These Financial Statements, which have been prepared in accordance with the Companies Act 2006, are presented in pounds sterling, which is the entity's functional currency, and, unless otherwise stated, rounded to the nearest million. Foreign operations are included in accordance with the policies set out in note 1.

Basis of preparation

These Financial Statements have been prepared in accordance with Financial Reporting Standard 101 (FRS 101) Reduced Disclosure Framework. The Company applies the recognition, measurement and disclosure requirements of International Financial Reporting Standards (IFRS), but makes amendments where necessary in order to comply with the Companies Act 2006 and has set out below where advantage of the FRS 101 disclosure exemptions has been taken:

- the requirements of paragraphs 45(b) and 46 to 52 of IFRS 2 Share-based Payment;
- the requirements of paragraphs 62, B64(d), B64(e), B64(g), B64(h), B64(j) to B64(m), B64(n)(ii), B64(o)(ii), B64(p), B64(q)(ii), B66 and B67 of IFRS 3 Business Combinations;
- the requirements of paragraph 33(c) of IFRS 5 Non-current Assets Held for Sale and Discontinued Operations;
- the requirements of IFRS 7 Financial Instruments: Disclosures;
- the requirements of paragraphs 91 to 99 of IFRS 13 Fair Value Measurement;
- the requirements of the second sentence of paragraph 110 and paragraphs 113(a), 114, 115, 118, 119(a) to (c), 120 to 127 and 129 of IFRS 15 Revenue from Contracts with Customers;
- The requirements of paragraphs 52, the second sentence of paragraph 89, and paragraphs 90, 91 and 93 of IFRS 16 Leases.
- the requirement in paragraph 38 of IAS 1 Presentation of Financial Statements, to present comparative
 information in respect of: paragraph 79(a)(iv) of IAS 1; paragraph 73(e) of IAS 16 Property, Plant and
 Equipment; paragraph 118(e) of IAS 38 Intangible Assets; and paragraphs 76 and 79(d) of IAS 40 Investment
 Property;
- the requirements of paragraphs 10(d), 10(f), 16, 38A, 38B, 38C, 38D, 40A, 40B, 40C, 40D, 111 and 134 to 136 of IAS 1 Presentation of Financial Statements;
- the requirements of IAS 7 Statement of Cash Flows;
- the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors:
- the requirements of paragraphs 17 and 18A of IAS 24 Related Party Disclosures;
- the requirements in IAS 24 Related Party Disclosures, to disclose related party transactions entered into between two or more members of a Group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member; and
- the requirements of paragraphs 130(f)(ii), 130(f)(iii), 134(d) to 134(f) and 135(c) to 135(e) of IAS 36 Impairment
 of Assets.

The Company intends to continue to prepare its Financial Statements in accordance with FRS 101.

The Company is exempt under section 400 of the Companies Act 2006 from the requirement to prepare consolidated Financial Statements as it and its subsidiary undertakings are included by full consolidation in the consolidated Financial Statements of its ultimate parent, BAE Systems plc, a company registered in England and Wales. Accordingly, these Financial Statements present information about the Company as an individual undertaking and not as a Group.

The Financial Statements have been prepared under the historical cost convention, as modified by the revaluation of relevant financial assets and financial liabilities (including derivative instruments). These Financial Statements have been prepared using the going concern basis of accounting.

1 Accounting policies (continued)

Critical accounting policies

Certain of the Company's significant accounting policies are considered by the Directors to be critical because of the level of complexity, judgement or estimation involved in their application and their impact on the Financial Statements. The critical accounting policies are listed below:

Critical accounting policy	Description
Revenue and profit recognition	The Company accounts for revenue in accordance with IFRS 15 Revenue from Contracts with Customers. For most of the Company's contracts, revenue and associated margin are recognised progressively over time as costs are incurred, and as risks have been mitigated or retired.
	The ultimate profitability of contracts is based on estimates of revenue and costs, including allowances for technical and other risks including the impacts of COVID-19 and climate change, which are reliant on the knowledge and experience of the Company's project managers, engineers, and finance and commercial professionals. Material changes in these estimates could affect the profitability of individual contracts. Revenue and cost estimates are reviewed and updated at least quarterly, and more frequently as determined by events or circumstances.
Deferred tax asset on post-employment benefit obligations	The Company has recognised a deferred tax asset in respect of the deficits in its pension/post-employment schemes.
	It is management's judgement that the Company will generate sufficient taxable profits to recover the net deferred tax asset recognised. This judgement requires the use of estimates of future taxable profits based on the Company's Integrated Business Plan.
Tax provisions	Provision is made for known issues based on management's interpretation of tax legislation and the likely outcome of negotiations or litigation. The Company's approach is to consider each uncertain tax position separately. Where management considers it is probable that there will be a future outflow of funds to a tax authority, a provision is recognised. The position is reviewed on an ongoing basis.
,	Provisions are measured using management's best estimate of the most likely amount, being the single most likely amount in a range of possible outcomes. The Company discloses any significant uncertainties in relation to tax matters to the relevant tax authority. The resolution of tax positions taken by the Company can take a considerable period of time to conclude and, in some cases, it is difficult to predict the outcome.
Valuation of post-employment benefit obligations	Defined benefit pension scheme accounting valuations are prepared by independent actuaries. The liabilities of the pension schemes are valued based on a number of actuarial assumptions.
	For each of the actuarial assumptions used there is a range of possible values and management estimates the point within that range that most appropriately reflects the Company's circumstances. Small changes in these assumptions can have a significant impact on the size of the deficit.

1 Accounting policies (continued)

Sources of estimation uncertainty

The application of the Company's accounting policies requires the use of estimates. The impact of the COVID-19 pandemic on economic activity has been, and is expected to continue to be, significant. While the Company has addressed the impact on its business effectively to date, it continues to conduct ongoing risk assessments and scenario planning in order that it can respond to potential rapid changes in circumstances, given the continuing uncertainty relating to the impact of the pandemic. While this uncertainty continues, the Company will need to consider a range of estimates and assumptions in the application of its accounting policies and management's assessment of the carrying values of assets and liabilities. In the event that these estimates or assumptions prove to be incorrect, there may be an adjustment to the carrying values of assets and liabilities within the next year. Potential areas of the Company's financial statements which could be materially impacted may include, but are not limited to:

- revenue and margin recognition on contracts, which is based on constraints on variable consideration, estimates of future costs and an assessment of technical and other risks. The long-term nature of many of the Company's contracts means that judgements are made in estimating future costs on a contract as well as when risks will be mitigated or retired. The impact of the COVID-19 pandemic has increased uncertainty in relation to these judgements and estimates. The Company continues to work closely and collaboratively with its key customers to continue to deliver effectively on its contracts and commitments. However, the volume, scale, complexity and long-term nature of its programmes mean that a range of calculated potential sensitivities would be wide-ranging and not practicable to calculate. Owing to the ongoing uncertainty regarding the future impact of the COVID-19 pandemic, the Company's estimates and assumptions relating to revenue could be impacted by issues such as reduced productivity as a result of altered working practices to comply with safety and social distancing requirements, production delays and increased costs as a result of disruption to the supply chain or where there is uncertainty as to the recovery from customers of programme costs incurred. As shown in note 2, the Company has recognised £0.2bn of revenue in respect of performance obligations satisfied or partially satisfied in previous periods (2019 £0.2bn). This continues to provide an approximation of the potential revenue sensitivity arising as a result of management's estimates and assumptions for variable consideration, future costs, and technical and other risks, although given its inherent uncertainty, it may not reflect the full potential impact of the pandemic;
- the valuation of post-employment benefit obligations and related deferred tax balances, if estimates relating to actuarial assumptions (including discount rate, inflation rate, and mortality assumptions) are no longer valid or change significantly as the impact of the pandemic develops. Discount and inflation rates could change significantly as a result of a prolonged economic downturn, monetary policy decisions and interventions or other macro-economic issues resulting from the pandemic. The impact of estimates made with regard to mortality projections may also change significantly, given the uncertainty in this area resulting from the pandemic. Note 21 provides information on the key assumptions and analysis of their sensitivities. Pension asset values could also be impacted by the economic uncertainty, for example if there is a longer-term impact on the valuation of assets for which there is no observable market value;

Judgements made in applying accounting policies

In the course of preparing the Financial Statements and when applying its accounting policies, the Company has been required to make judgements with regard to the actions required to enable the business to continue to meet customers' requirements, in an operating environment still dominated by the uncertainties arising from the COVID-19 pandemic. No judgements have been made in the process of applying the Company's accounting policies, other than those involving estimates, that have had a significant effect on the amounts recognised in the Financial Statements.

Changes in accounting policies

Several standards, interpretations and amendments to existing standards became effective on 1 January 2020, none of which had a material impact on the Company.

Significant accounting policies

The significant accounting policies applied in the preparation of these Financial Statements are set out below. These policies have been applied consistently to all the years presented, unless otherwise stated. The Directors believe that the Financial Statements reflect appropriate judgements and estimates, and provide a true and fair view of the Company's financial performance and position.

Revenue and profit recognition

Revenue represents income derived from contracts for the provision of goods and services, over time or at a point in time, by the Company to customers in exchange for consideration in the ordinary course of the Company's activities.

1 Accounting policies (continued)

Performance obligations

Upon approval by the parties to a contract, the contract is assessed to identify each promise to transfer either a distinct good or service or a series of distinct goods or services that are substantially the same and have the same pattern of transfer to the customer. Goods and services are distinct and accounted for as separate performance obligations in the contract if the customer can benefit from them either on their own or together with other resources that are readily available to the customer and they are separately identifiable in the contract.

The Company provides warranties to its customers to give them assurance that its products and services will function in line with agreed-upon specifications. Warranties are not provided separately and, therefore, do not represent separate performance obligations. A provision for warranties is recognised when the underlying products and services are sold (see note 22 for further detail).

Transaction price

At the start of the contract, the total transaction price is estimated as the amount of consideration to which the Company expects to be entitled in exchange for transferring the promised goods and services to the customer, excluding sales taxes. Variable consideration, such as variable price mechanisms, is included based on the expected value or most likely amount only to the extent that it is highly probable that there will not be a reversal in the amount of cumulative revenue recognised. The transaction price does not include estimates of consideration resulting from contract modifications, such as change orders, until they have been approved by the parties to the contract. The total transaction price is allocated to the performance obligations identified in the contract in proportion to their relative stand-alone selling prices. Given the bespoke nature of many of the Company's products and services, which are designed and/or manufactured under contract to the customer's individual specifications, there are typically no observable stand-alone selling prices. Instead, stand-alone selling prices are typically estimated based on expected costs plus contract margin consistent with the Company's pricing principles.

Whilst payment terms vary from contract to contract, on many of the Company's contracts, an element of the transaction price is received in advance of delivery. The Company therefore has significant contract liabilities. The Company's contracts are not considered to include significant financing components on the basis that there is no difference between the consideration and the cash selling price. UK Ministry of Defence contracting rules prohibit the inclusion of financing in the sales price. Negotiations on competitive international export contracts do not make allowance for the cash payment profile.

Revenue and profit recognition

Revenue is recognised as performance obligations are satisfied as control of the goods and services is transferred to the customer.

For each performance obligation within a contract, the Company determines whether it is satisfied over time or at a point in time. Performance obligations are satisfied over time if one of the following criteria is satisfied:

- the customer simultaneously receives and consumes the benefits provided by the Company's performance as it performs;
- the Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- the Company's performance does not create an asset with an alternative use to the Company and it has an
 enforceable right to payment for performance completed to date.

The Company has determined that most of its contracts satisfy the over-time criteria, either because the customer simultaneously receives and consumes the benefits provided by the Company's performance as it performs (typically services or support contracts) or the Company's performance does not create an asset with an alternative use to the Company and it has an enforceable right to payment for performance completed to date (typically development or production contracts).

For each performance obligation to be recognised over time, the Company recognises revenue using an input method, based on costs incurred in the period. Revenue and attributable margin are calculated by reference to reliable estimates of transaction price and total expected costs, after making suitable allowances for technical and other risks including the impact of COVID-19 and climate change. Revenue and associated margin are therefore recognised progressively as costs are incurred, and as risks have been mitigated or retired. The Company has determined that this method appropriately depicts the Company's performance in transferring control of the goods and services to the customer.

If the over-time criteria for revenue recognition are not met, revenue is recognised at the point in time that control is transferred to the customer, which is usually when legal title passes to the customer and the business has the right to payment, for example, on delivery.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised immediately as an expense.

1 Accounting policies (continued)

Contract modifications

The Company's contracts are often amended for changes in customers' requirements and specifications. A contract modification exists when the parties to the contract approve a modification that either changes existing or creates new enforceable rights and obligations. The effect of a contract modification on the transaction price and the Company's measure of progress towards the satisfaction of the performance obligation to which it relates is recognised in one of the following ways:

- 1. prospectively, as an additional, separate contract; or
- 2. prospectively, as a termination of the existing contract and creation of a new contract; or
- 3. as part of the original contract using a cumulative catch-up.

The majority of the Company's contract modifications are treated under either 1 (for example, the requirement for additional distinct goods or services) or 3 (for example, a change in the specification of the distinct goods or services for a partially completed contract), although the facts and circumstances of any contract modification are considered individually as the types of modifications will vary contract-by-contract and may result in different accounting outcomes.

Costs to obtain a contract

The Company expenses pre-contract bidding costs which are incurred regardless of whether a contract is awarded. The Company does not typically incur costs to obtain contracts that it would not have incurred had the contracts not been awarded, such as sales commission.

Costs to fulfil a contract

Contract fulfilment costs in respect of over-time contracts are expensed as incurred. Contract fulfilment costs in respect of point in time contracts are accounted for under IAS 2 Inventories.

Leases

The Company as lessee

All leases in which the Company is lessee (except as noted below) are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Company. Each lease payment is allocated between repayment of the lease liability and finance cost. The finance cost is charged to the Income Statement over the lease term to produce a constant periodic rate of interest on the lease liability. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

The lease liability is initially measured as the present value of future lease payments, discounted using the interest rate implicit in the lease. Where this rate is not determinable, the Company's incremental borrowing rate is used, which is the interest rate the Company would have to pay to borrow the amount necessary to obtain an asset of similar value, in a similar economic environment with similar terms and conditions.

The right-of-use asset is initially measured at cost, comprising the initial value of the lease liability, any lease payments made (net of any incentives received from the lessor) before the commencement of the lease, any initial direct costs and any restoration costs.

The carrying amounts of the Company's right-of-use assets are reviewed at each Balance Sheet date to determine whether there is any indication of impairment.

Payments in respect of short-term leases, low-value leases and leases of intangible assets are charged to the Income Statement on a straight-line basis over the lease term.

The Company as lessor

Leases in which the Company is lessor are classified as finance leases or operating leases. If the lease transfers substantially all of the risks and rewards of ownership to the lessee, the lease is classified as a finance lease. All other leases are classified as operating leases.

Lease income under operating leases is recognised in the Income Statement on a straight-line basis over the lease term.

Amounts due from lessees under finance leases are recognised as a receivable discounted at the interest rate implicit in the lease. Finance lease income is recognised in the Income Statement over the lease term to produce a constant periodic rate of interest on the receivable.

1 Accounting policies (continued)

Research and development

The Company undertakes research and development activities either on its own behalf or on behalf of customers.

Company-funded expenditure on research and development activities not meeting the conditions for capitalisation is written off as incurred and charged to the Income Statement.

Where the research and development activity is performed on behalf of customers, the revenue arising is recognised in the Income Statement in accordance with the Company's revenue recognition policy.

Interest income and borrowing costs

Interest income and borrowing costs are recognised in the Income Statement in the period in which they are incurred.

Dividends

Dividends received and receivable are credited to the Company's Income Statement. Equity dividends paid on ordinary share capital are recognised as a liability in the period in which they are declared.

Intangible assets

Intangible assets are carried at cost or valuation, less accumulated amortisation and impairment losses:

Goodwill

Under the acquisition method for business combinations, goodwill is the acquisition-date fair value of the consideration transferred, less the net of the acquisition-date fair values of the identifiable assets acquired and liabilities assumed. Goodwill on acquisitions of businesses is included in intangible assets. Gains and losses on the disposal of a business include the carrying amount of goodwill relating to the business sold.

Software

Software includes:

- Computer software licences acquired for use within the Company which are capitalised as an intangible asset on the basis of the costs incurred to acquire and bring to use the specific software; and
- Software development costs that are directly associated with the production of identifiable and unique software
 products controlled by the Company, and that will probably generate economic benefits exceeding costs
 beyond one year, which are recognised as intangible assets. Company-funded expenditure associated with
 enhancing or maintaining computer software programs for sale is recognised as an expense as incurred.

Development costs

Development costs funded by the Company on activities applied to a plan or design for the production of new or substantially improved products are capitalised as an internally generated intangible asset if certain conditions are met. The costs capitalised include materials, direct labour and related overheads.

Amortisation

Goodwill is not amortised. Amortisation on intangible assets, excluding goodwill, is charged to the Income Statement on a straight-line basis over their estimated useful lives.

The estimated useful lives are as follows:

Software - up to 5 years

Development costs - up to 10 years

The Company has no indefinite-life intangible assets other than goodwill.

Property, plant and equipment

Cost

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. The cost of self-constructed assets includes the cost of materials, direct labour and an appropriate proportion of production overheads. The cost of demonstration assets is written off as incurred.

Assets held for leasing out under operating leases are included in property, plant and equipment at cost less accumulated depreciation and impairment losses.

1 Accounting policies (continued)

Depreciation

Depreciation is provided, normally on a straight-line basis, to write off the cost of property, plant and equipment over their estimated useful lives to any estimated residual value, using the following rates:

Buildings - up to 50 years, or the lease term if shorter

Plant and machinery:

Computing equipment and motor vehicles - 4 to 5 years

Other equipment - 10 to 20 years, or the project life if shorter

No depreciation is provided on freehold land or assets in the course of construction.

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each Balance Sheet date.

Impairment

The carrying amounts of the Company's property, plant and equipment are reviewed at each Balance Sheet date to determine whether there is any indication of impairment.

Investment property

Cost

Land and buildings that are held to earn rentals or for capital appreciation are classified as investment property. The Company measures investment property at its cost less accumulated depreciation and impairment losses.

Depreciation

Depreciation is provided, on a straight-line basis, to write off the cost of investment property over its estimated useful life of up to 50 years.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each Balance Sheet date.

Impairment

The carrying amounts of the Company's investment property are reviewed at each Balance Sheet date, to determine whether there is any indication of impairment.

Investments in subsidiary undertakings and participating interests

Investments in subsidiary undertakings and in participating interests are stated at cost less provision for impairment.

Impairment

The carrying amounts of the Company's assets are reviewed at each Balance Sheet date to determine whether there is any indication of impairment as required by IAS 36 Impairment of Assets. If any such indication exists, the asset's recoverable amount is estimated. For goodwill and intangible assets that are not yet available for use, impairment testing is performed annually.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

The recoverable amount is the greater of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using an appropriate pre-tax discount rate. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Impairment losses are recognised in the Income Statement.

An impairment loss in respect of other intangible assets, property, plant and equipment, investment property and rightof-use assets is reversed if the subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised or if there has been a change in the estimate used to determine the recoverable amount.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

1 Accounting policies (continued)

Foreign currencies

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the exchange rates ruling at the Balance Sheet date. These exchange differences are recognised in the Income Statement.

The assets and liabilities of foreign currency branches are translated at the exchange rates ruling at the Balance Sheet date. The Income Statements of these branches are translated at average rates of exchange during the year. All resulting exchange differences are recognised in the translation reserve.

Inventories

Inventories are stated at the lower of cost, including all relevant overhead expenditure, and net realisable value.

Trade, other and contract receivables

Trade receivables are measured at amortised cost under IFRS 9 Financial Instruments as they are held within a business model to collect contractual cash flows and these cash flows consist solely of payments of principal and interest on the principal amount outstanding.

Contract receivables represent amounts for which the Company has an unconditional right to consideration in respect of unbilled revenue recognised at the Balance Sheet date and comprise costs incurred plus attributable margin.

Trade receivables, contract receivables, finance lease receivables and amounts owed by BAE Systems plc subsidiaries and joint ventures include a provision for expected credit losses. The Company measures the provision at an amount equal to lifetime expected credit losses, estimated by reference to past experience and relevant forward-looking factors.

The Company writes off a receivable when there is objective evidence that the debtor is in significant financial difficulty and there is no realistic prospect of recovery, for example, when a debtor enters bankruptcy or financial reorganisation.

Cash and cash equivalents

Cash and cash equivalents includes cash in hand, call and term deposits, and other short-term liquid investments with original maturities of three months or less and which are subject to an insignificant risk of change in value.

Trade and other payables

Trade and other payables are stated at amortised cost.

Tax

Tax expense comprises current and deferred tax. Current and deferred tax is recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or other comprehensive income.

Current tax

Current tax is the expected tax payable or receivable on the taxable profit or loss for the year, using tax rates enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for temporary differences:

- on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- related to investments in subsidiaries and equity accounted investments to the extent that it is probable that
 they will not reverse in the foreseeable future; and
- · arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

1 Accounting policies (continued)

The most significant recognised deferred tax assets relate to the Company's share of pension scheme deficits. This is because post-employment benefit costs are deducted in determining accounting profit as service is provided by employees, but deducted in determining taxable profit when contributions are paid to the post-employment benefit schemes or when post-employment benefits are paid.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority and they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

Provisions

A provision is recognised in the Balance Sheet when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and the amount has been reliably estimated. If the effect is material, provisions are determined by discounting the expected future cash flows at an appropriate pre-tax discount rate.

Warranties and after-sales service

Warranties and after-sales service are provided in the normal course of business with provisions for associated costs being made based on an assessment of future claims with reference to past experience. A provision for warranties is recognised when the underlying products and services are sold. The provision is based on historical warranty data and a weighting of possible outcomes against their associated probabilities.

Reorganisations

A provision for restructuring is recognised when the Company has approved a detailed and formal restructuring plan, and the restructuring has either commenced or has been announced to those affected. The costs associated with the restructuring programmes are supported by detailed plans and based on previous experience as well as other known factors. Future operating costs are not provided for.

Legal, contractual and environmental

The Company holds provisions for expected legal, contractual and environmental costs that it expects to incur over an extended period. Management exercises judgement to determine the amount of these provisions. Provision is made for known issues based on past experience of similar items and other known factors. Each provision is considered separately and the amount provided reflects the best estimate of the most likely amount, being the single most likely amount in a range of possible outcomes.

Post-employment benefits

Defined contribution pension schemes

A defined contribution pension scheme is a post-employment benefit plan under which the Company pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts.

Obligations for contributions are recognised as an expense in the Income Statement as incurred.

Defined benefit pension schemes

The cost of providing benefits is determined periodically by independent actuaries and charged to the Income Statement in the period in which those benefits are earned by the employees. Remeasurements, including actuarial gains and losses, are recognised in the Statement of Comprehensive Income in the period in which they occur. Past service costs resulting from a plan amendment or curtailment are recognised immediately in the Income Statement.

The retirement benefit surpluses and obligations recognised in the Company's Balance Sheet represents the fair value of scheme assets, less the present value of the defined benefit obligations calculated using a number of actuarial assumptions as set out on page 49. The bid values of scheme assets are not intended to be realised in the short term and may be subject to significant change before they are realised. The present values of scheme liabilities are derived from cash flow projections over long periods and are, therefore, inherently uncertain.

IAS 19 Employee Benefits limits the measurement of a defined benefit surplus to the lower of the surplus in the defined benefit scheme and the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the scheme or reductions in future contributions to the scheme. IFRIC 14 IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction, issued in 2007, provides an interpretation of the requirements of IAS 19, clarifying that a refund is available if the entity has an unconditional right to a refund in certain circumstances. The Company has applied IFRIC 14 and has determined that there is no limit on the recognition of the surpluses in its defined benefit pension schemes as at 31 December 2020.

1 Accounting policies (continued)

Post-employment benefits (continued)

The Company participates in a number of group and multi-employer schemes administered by its ultimate parent company, BAE Systems plc. A share of the IAS 19 Employee Benefits pension deficit has been allocated to all participating employers. This allocation is based on the relative payroll contributions of active members, which is consistent with prior years. Whilst this methodology is intended to reflect a reasonable estimate of the share of the deficit, it may not accurately reflect the obligations of the participating employers. Gains and losses resulting from changes to the relative payroll contributions of active members year on year are included within actual return on assets and actuarial gains and losses for the disclosures in respect of changes in the fair value of scheme assets and changes in the present value of defined benefit obligations, respectively.

In the event that an employer who participates in BAE Systems plc's pension schemes fails or cannot be compelled to fulfil its obligations as a participating employer, the remaining participating employers are obliged to collectively take on its obligations. The Company considers the likelihood of this event arising as remote.

Share-based payments

BAE Systems plc, the Company's ultimate parent company, issues equity-settled share-based payment awards to employees of the Company. In accordance with the requirements of IFRS 2 Share-based Payment, the Company has recognised a charge for these awards issued to its employees.

Equity-settled share options and Long-Term Incentive Plan arrangements are measured at fair value at the date of grant using an option pricing model.

The fair value is expensed on a straight-line basis over the vesting period, based on the Company's estimate of the number of shares that will actually vest.

Financial instruments

Derivative financial instruments and hedging activities

The international nature of the Company's business means that it is exposed to volatility in currency exchange rates. In order to protect itself against currency fluctuations, the Company's policy is to hedge all material firm transactional exposures.

In accordance with its treasury policy, the Company does not hold derivative financial instruments for trading purposes.

Derivative financial instruments are recognised initially at fair value. Subsequent to initial recognition, such instruments are stated at fair value at the Balance Sheet date. The fair values are estimated by discounting expected future cash flows.

Fair value through profit or loss

Gains and losses on derivative financial instruments that are not designated as cash flow hedges are recognised within finance costs in the Income Statement for the period.

Cash flow hedges

Where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows relating to a highly probable forecast transaction (income or expense) or recognised asset or liability, the effective portion of any change in the fair value of the instrument is recognised in other comprehensive income and presented in the hedging reserve in equity. Amounts recognised in equity are removed from the hedging reserve and included in the cost of the underlying transaction or reclassified to the Income Statement when the underlying transaction affects profit or loss. These amounts are presented within the same line item in the Income Statement as the underlying transaction, typically revenue or operating costs. The ineffective portion of any change in the fair value of the instrument is recognised in the Income Statement within finance costs immediately. The Company treats the foreign currency basis element of the designated foreign exchange derivative hedging instruments as a cost of hedging and as such it is excluded from the hedge designation.

^{1.} As at 31 December 2019 legislation was in place for the UK corporation tax rate to be reduced from 19% to 17% with effect from 1 April 2020. However, under the Finance Act 2020, the rate was retained at 19%. The deferred tax assets at each Balance Sheet date have been calculated at the tax rates, enacted at that date, expected to apply to the temporary differences when they reverse. The resulting tax rate adjustment has been partly recorded in the Income Statement and partly in the Statement of Comprehensive Income.

^{1.} As at 31 December 2019 legislation was in place for the UK corporation tax rate to be reduced from 19% to 17% with effect from 1 April 2020. However, under the Finance Act 2020, the rate was retained at 19%. The deferred tax assets at each Balance Sheet date have been calculated at the tax rates, enacted at that date, expected to apply to the temporary differences when they reverse. The resulting tax rate adjustment has been partly recorded in the Income Statement and partly in the Statement of Comprehensive Income.

Impairment testing

The recoverable amount of the Company's goodwill is based on value-in-use estimated using risk-adjusted future cash flow projections from the five-year Integrated Business Plan and a terminal value based on the projections for the final year of that plan, with a growth rate assumption of 2% applied. The Integrated Business Plan process includes the use of historical experience, available government spending data and the Company's order backlog. A pre-tax discount rate, derived from the Company's post-tax weighted average cost of capital of 6.13% (2019 6.62%) (adjusted for risks specific to the market in which the cash-generating unit operates), has been used in discounting these projected risk-adjusted cash flows.

Software

The software intangible assets balance includes £63m (2019 £85m) relating to an Enterprise Resource Planning transformation programme which went live during the year. The remaining amortisation period is three years.

Capital commitments

At 31 December 2020, capital expenditure of £1m (2019 £1m) in respect of intangible assets was contracted but not provided for in the Financial Statements.

11 Leases

The Company leases land, buildings, vehicles and equipment under non-cancellable lease arrangements. The leases have varying terms, including escalation clauses, renewal rights and purchase options. None of these terms represent unusual arrangements or create material onerous or beneficial rights or obligations.

As at 31 December 2019 legislation was in place for the UK corporation tax rate to be reduced from 19% to 17% with effect from 1 April 2020. However, under the Finance Act 2020, the rate was retained at 19%. The deferred tax assets at each Balance Sheet date have been calculated at the tax rates, enacted at that date, expected to apply to the temporary differences when they reverse (2020: 19%, 2019: 17%). The resulting tax rate adjustment has been partly recorded in the Income Statement and partly in the Statement of Comprehensive Income.

On 3 March 2021, the Government announced that the UK corporation tax rate would be increased from 19% to 25% with effect from 1 April 2023. As this rate change was not enacted at the Balance Sheet date, the impact of the higher rate has not been taken into account in the calculation of the deferred tax assets and the rate applying at 31 December 2020 was 19%. The impact of the rate change is difficult to quantify but may result in a significant change to the deferred tax assets.

21 Post-employment benefits

Background

BAE Systems plc operates pension schemes for qualifying employees in the UK, US and other countries. The principal schemes in the UK are funded defined benefit schemes and the assets are held in separate trustee-administered funds. The allocation of each Company's share of the pension deficit is based on the relative payroll contributions of active members, as outlined on page 33.

At 31 December 2020, the weighted average duration of the UK defined benefit pension obligations was 18 years (2019 17 years).

The Company participates in the following BAE Systems plc schemes: BAE Systems Pension Scheme (Main Scheme), Royal Ordnance Pension Scheme

The split of the defined benefit pension liability on a funding basis between active, deferred and pensioner members for the most significant schemes (based on the size of the closing net deficit/surplus) is set out below:

	Active %	Deferred %	Pensioner %
Main Scheme (merged) ¹	31	21	48
Royal Ordnance Pension Scheme ²	18	20	62

^{1.} Source: 31 October 2019 actuarial valuation reports for the legacy schemes within the recently-merged Main Scheme.

^{2.} Source: Royal Ordnance Pension Scheme actuarial valuation as at 31 March 2017.

21 Post-employment benefits (continued)

Regulatory framework

The funded UK schemes are registered and subject to the statutory scheme-specific funding requirements outlined in UK legislation, including the payment of levies to the Pension Protection Fund as set out in the Pension Act 2004. These schemes were established under trust and the responsibility for their governance lies jointly with the trustees and BAE Systems plc.

Benefits

The UK defined benefit schemes provide benefits to members in the form of a set level of pension payable for life based on members' final salaries. The benefits attract inflation-related increases both in deferment and payment. All UK defined benefit schemes are closed to new entrants, with benefits for new employees being provided through a defined contribution scheme. The Normal Retirement Age for active members of the Main Scheme is 65. Specific benefits applicable to members differ between schemes. Further details on the benefits provided by each scheme are provided on the BAE Systems Pensions website: www.baesystemspensions.com.

A UK High Court judgment was delivered on 26 October 2018 concerning gender equalisation for the effect of Guaranteed Minimum Pensions (GMPs) for occupational pension schemes. In 2018, a non-recurring past service cost was included in the income statement to reflect the expectation that the impact of GMP equalisation would increase the pension deficit in the balance sheet. In 2020, an allowance was included within the pension deficit which is a consistent proportion of the UK liabilities as applied in 2018 and 2019 and reflects the updated UK IAS 19 valuations as at 31 December 2020.

A further UK High Court judgment was delivered on 20 November 2020 which ruled that past cash-equivalent transfer values needed to account for gender equalisation for the effect of GMPs. The additional liability resulting from this has been included within the 2020 pension deficit and recognised as a past service cost.

Other post-employment benefits

The Company provides an end of service benefit to employees in Saudi Arabia. These liabilities are presented within post-employment benefits as at 31 December 2020.

Funding

Introduction

Disclosures in respect of pension funding provided below reflect the pension schemes as a whole. Disclosures in respect of pension accounting under IAS 19 are provided on pages 49 to 53.

The majority of the UK defined benefit pension schemes are funded by BAE Systems plc's subsidiaries and equity accounted investments. The individual pension schemes' funding requirements are based on actuarial measurement frameworks set out in their funding policies.

For funding valuation purposes, pension scheme assets are included at market value at the valuation date, whilst the liabilities are measured on an actuarial funding basis using the projected unit credit method and discounted to their present value based on prudent assumptions set by the trustees following consultation with scheme actuaries.

The funding valuations are performed by professionally qualified independent actuaries and include assumptions which differ from the actuarial assumptions used for IAS 19 accounting purposes shown on page 49. The purpose of the funding valuations is to design funding plans which ensure that the schemes have sufficient funds available to meet future benefit payments.

Valuations

Funding valuations of the UK defined benefit schemes are performed every three years. Following the merger of several of the UK pension schemes in October 2019, BAE Systems plc and the trustees agreed to carry out an early triennial funding valuation for the Main Scheme as at 31 October 2019. The funding valuations as at 31 March 2020 are ongoing for the Royal Ordnance Pension Scheme. The valuation is expected to be concluded during the first half of 2021.

21 Post-employment benefits (continued)

The results of the most recent triennial valuations are shown below. These valuations and, where necessary, deficit recovery plans were agreed with the trustees and certified by the scheme actuaries after consultation with The Pensions Regulator in the UK.

	Main Scheme as at 31 October 2019 £bn	Other schemes as at 31 March 2017 £bn
Market value of assets	20.6	2.2
Present value of liabilities	(22.5)	(2.0)
Funding (deficit)/surplus	(1.9)	0.2
Percentage of accrued benefits covered by the assets at the valuation date	92%	110%

The valuations in 2017 and 2019 were determined using the following mortality assumptions:

Life expectancy of a male currently aged 65 (years)		86 – 89
Life expectancy of a female currently aged 65 (years)	•	87 – 90
Life expectancy of a male currently aged 45 (years)	•	88 – 92
Life expectancy of a female currently aged 45 (years)		90 – 93

The discount rate assumptions used in the 2017 and 2019 valuations were directly based on prudent levels of expected returns for the assets held by the schemes, reflecting the planned investment strategies and maturity profiles of each scheme. The discount rates are curves which provide a different rate for each year into the future.

The inflation assumptions were derived using data from the Bank of England which is based on the difference between the yields on index-linked and fixed interest long-term government bonds. The inflation assumption is a curve which provides a different rate for each year into the future.

The funding valuations resulted in a significantly lower deficit than under IAS 19, largely due to lower liabilities reflecting the higher discount rate assumption. Under IAS 19, the discount rate for accounting purposes is based on third-party AA corporate bond yields whereas, for funding valuation purposes, the discount rate is based on a prudent level of expected returns from the broader and mixed types of investments reflected in the schemes' investment strategies, which are expected overall to yield higher returns than bonds.

The 2019 funding agreement is underpinned by a contingency plan, which includes a commitment by BAE Systems plc to a further £50m of deficit funding in each of 2021 and 2022 into the Main Scheme prior to the next triennial valuation in the event that the scheme funding level were to fall below pre-determined parameters. In addition, BAE Systems plc would be required to pay £187m in respect of the Main Scheme if the funding level were to fall significantly and were to remain at or below those levels for nine months.

There have been no changes to the contributions or benefits, as set out in the rules of the schemes, for pension scheme members as a result of the new funding valuations.

The results of future triennial valuations and associated funding requirements will be impacted by a number of factors, including the future performance of investment markets and anticipated members' longevity.

Contributions

Under the terms of the trust deeds of the UK schemes, BAE Systems plc is required to have a funding plan determined at the conclusion of the triennial funding valuations.

The total Company contributions made to the defined benefit pension schemes in the year ended 31 December 2020 were £834m (2019 £255m).

As part of the 31 October 2019 valuation agreement, BAE Systems plc agreed to pay £1bn into the Main Scheme in 2020 representing an advancement of £1bn in deficit contributions that were due, under the 2017 valuation deficit recovery plan, between 2022 and 2026. This was paid in April 2020. The annual payment for 2021 was also accelerated and paid in December 2020. No further annual payments are now due subject to the contingency plan discussed above.

IAS 19 Accounting

Principal actuarial assumptions

The disclosures below relate to pension schemes in the UK which are accounted for as defined benefit schemes in accordance with IAS 19.

The assumptions used are estimates chosen from a range of possible actuarial assumptions which, due to the long-term nature of the obligation covered, may not necessarily occur in practice.

	2020	2019	2018
Financial assumptions			
Discount rate – past service (%)	1.4	2.1	2.9

Rate of increase in deferred pensions (%)	2.0/2.7	2.0/2.8	2.1/3.1
Rate of increase in pensions in payment (%)	1.6 - 3.6	1.5 - 3.6	1.6 - 3.7
Demographic assumptions			
Life expectancy of a male currently aged 65 (years)	86 – 88	87 – 88	86 – 88
Life expectancy of a female currently aged 65 (years)	88 – 90	88 – 90	88 – 90
Life expectancy of a male currently aged 45 (years)	87 – 89	88 – 89	88 – 90
Life expectancy of a female currently aged 45 (years)	89 – 91	89 – 91	90 – 91

Discount rate

The discount rate assumptions are derived through discounting the projected benefit payments of the principal schemes using a third-party AA corporate bond yield curve to produce a single equivalent discount rate. This inherently captures the maturity profile of the expected benefit payments. The discount rate used for future service differs from that used for past service as it only uses the cash flows relating to active members, which have a different duration. Further information on the duration of the schemes is detailed on page 45.

Retail Prices Index (RPI) and Consumer Prices Index (CPI) inflation

The inflation assumptions are derived by reference to the difference between the yields on index-linked and fixed-interest long-term government bonds, or advice from the local actuary depending on the available information. Index-linked government bonds contain a premium that investors are willing to pay to mitigate the risk that RPI inflation is higher than expected. To account for this, the RPI assumption includes an inflation risk premium deduction.

As a consequence of RPI reform announcements during 2019 and the outcome of the RPI consultation in November 2020, the Company has reviewed its approach to setting inflation assumptions. The inflation risk premium deduction has been set at 0.5% per annum (2019 0.35%) and the CPI assumption has been set at 0.7% per annum (2019 0.8%) lower than RPI. The resulting RPI assumption is 2.7% per annum and the CPI assumption is 2.0% per annum. The 0.7% per annum RPI-CPI differential is a weighted average of a 1% per annum differential pre-2030 and 0.1% per annum differential post-2030; this reflects the anticipated change to the RPI index from 2030.

Rate of increase in salaries

The rate of increase in salaries for the UK schemes is assumed to be RPI inflation of 2.7% (2019 2.8%), plus a promotional scale.

Rate of increase in deferred pensions

The rate of increase in deferred pensions is based on CPI inflation of 2.0% (2019 2.0%), with the exception of the legacy 2000 Plan, which is based on RPI inflation of 2.7% (2019 2.8%). The rate of increase in deferred pensions is subject to inflation caps.

Rate of increase in pensions in payment

The rate of increase in pensions in payment differs between UK schemes. Different tranches of the schemes increase at rates based on either RPI or CPI inflation, and some are subject to an inflation cap. With the exception of two smaller schemes, the rate of increase in pensions in payment is based on RPI inflation.

21 Post-employment benefits (continued)

Life expectancy

The Company has used the Self-Administered Pension Schemes S2 mortality tables based on year of birth (as published by the Institute of Actuaries) for both pensioner and non-pensioner members in conjunction with the results of an investigation into the actual mortality experience of scheme members and information on the demographic profile of the scheme's membership.

In addition, to allow for future improvements in longevity, the Continuous Mortality Investigation 2019 tables (published by the Institute of Actuaries) have been used (in 2019, the Continuous Mortality Investigation 2018 tables were used), with an assumed long-term rate of future annual mortality improvements of 1.0% (2019 1.0%), an initial rate adjustment parameter ('A') of 0.25% (2019 0.25%) in conjunction with a smoothing parameter ('Sk') of 7 for all members (2019 7). A refinement has been made to the standard 2019 model for the purpose of the IAS 19 valuation, resulting in no weighting being given to the assumed life expectancy improvement in 2020. This is in recognition of the excess deaths in 2020 due to COVID-19; however, the assumption is that future years will return to more 'normal' life expectancy improvements. The CMI is considering changing its methodology and more data may emerge on the long-term impact of COVID-19 which could impact this set of assumptions going forward, given the uncertainty that exists.

The disclosures below are in respect of the Company's share of the IAS 19 deficit using the allocation methodology outlined on page 33.

Summary of movements in post-employment benefit obligations

	Defined benefit pension schemes £m	Saudi Arabia end of service benefit £m	Total £m
Company's share of IAS 19 deficit at 1 January 2020	(2,226)	(53)	(2,279)

The Company incurred a charge of £13m (2019 £10m) in relation to defined contribution schemes for employees.

21 Post-employment benefits (continued)

Sensitivity analysis

The sensitivity information has been derived using scenario analysis from the actuarial assumptions as at 31 December 2020 and keeping all other assumptions as set out on page 47.

Financial assumptions

The estimated impact of changes in the discount rate and inflation assumptions on the defined benefit pension obligation, together with the estimated impact on scheme assets after allocation to other participating employers, is shown in the table below. The estimated impact on scheme assets takes into account the risk management activities in respect of interest rate and inflation risk. The sensitivity analysis on the defined benefit obligation is measured on an IAS 19 accounting basis and, therefore, does not reflect the natural hedging in the discount rate used for funding valuation purposes.

	(Increase)/ decrease in pension obligation £bn	Increase/ (decrease) in scheme assets £bn
Discount rate:	• •	
0.1 percentage point increase	. 0.3	(0.1)
0.1 percentage point decrease	(0.3)	0.1
Inflation:		
0.1 percentage point increase	(0.3)	0.1
0.1 percentage point decrease	0.3	(0.1)

The sensitivity of the valuation of the liabilities to changes in the inflation assumption presented above assumes that a 0.1 percentage point change to expectations of future inflation results in a 0.1 percentage point change to all inflation-related assumptions (rate of increase in salaries, rate of increase in deferred pensions and rate of increase in pensions in payment) used to value the liabilities. However, upper and lower limits exist on the majority of inflation-related benefits such that a change in expectations of future inflation may not have the same impact on the inflation-related benefits, and hence will result in a smaller change to the valuation of the liabilities. Accordingly, extrapolation of the above results beyond the specific sensitivity figures shown may not be appropriate. To illustrate this, the (increase)/decrease in the defined benefit pension obligation resulting from larger changes in the inflation assumption would be as follows:

	(Increase)/ decrease in pension obligation £bn		
Inflation:			
0.5 percentage point increase	(0.9)		
0.5 percentage point decrease	0.7		
1.0 percentage point increase	(1.8)		
1.0 percentage point decrease	1.5		

Demographic assumptions

Changes in the life expectancy assumption, including the benefit of longevity swap arrangements, would have the following effect on the net IAS 19 deficit:

• •		(Increase)/ decrease in net deficit £bn
Life expectancy:		
One-year increase		(0.7)
One-year decrease	100	0.6

22 Provisions

Represented by:					
Non-current	11	2	. 2	_	15
Current	13	16	43	6	78
	24	18	45	6	93

Warranties and after-sales service

Warranty and after-sales service costs are generally incurred within three years post-delivery. Whilst actual events could result in potentially significant differences to the quantum, but not the timing, of the outflows in relation to the provisions, management has reflected current knowledge in assessing the provision levels.

Reorganisations

Reorganisation costs are generally incurred within one to three years. There is limited volatility around the timing and amount of the ultimate outflows related to these provisions.

Other debtors includes £9m (2019 £18m) which is reimbursable in respect of reorganisation costs.

Legal, contractual and environmental

Reflecting the inherent uncertainty within many legal proceedings, the amount of the outflows could differ significantly from the amount provided. While the timing of the outflows is uncertain, the Company expects the majority of these provisions to be utilised over a period of approximately one year.

Other

There are no individually significant provisions within other provisions.

23 Share capital and other reserves

Share capital

	£1 'A' Ordinary shares '000	£1 'B' Ordinary shares '000	Nominal value £m	
Issued and fully paid				
At 1 January 2019, 31 December 2019 and 31 December 2020	1,007,340	180	1,008	

The 'A' and 'B' Ordinary shares rank pari passu in all respects.

The Directors propose a dividend of £310m for 2020 (2019 £nil). The dividend proposed in 2018 of £154m was paid in 2019.

Hedging reserve

The hedging reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged transactions that have not yet occurred.

Translation reserve

The translation reserve comprises all foreign currency differences arising from the translation of the results and financial position of foreign currency branches.

24 Related party transactions

The Company has a related party relationship with non wholly-owned BAE Systems Group subsidiaries, BAE Systems Group joint ventures and BAE Systems Group pension schemes. Transactions occur with related parties in the normal course of business, are priced on an arm's-length basis and settled on normal trade terms. The significant transactions are disclosed below:

25 Share-based payments

Share-based payment awards in respect of shares in the ultimate parent company, BAE Systems plc, have been granted to employees of the Company under various plans. Details of the terms and conditions of each share-based payment plan are given in the Annual Remuneration Report of the BAE Systems plc Annual Report 2020.

For options outstanding at the end of the year:

	20	2019		
	•	remaining contracted life	Range of exercise price of outstanding options	Weighted average remaining contracted life
	(£)	(years)	(£)	(years)
Executive Share Option Plan	3.89 - 6.49	8	3.89 - 6.49	8
Performance Share Plan	-	5	-	5

The average share price in the year was £5.24 (2019 £5.21).

26 Contingent liabilities

The Company has no individually significant contingent liabilities.

27 Events after the reporting period

There were no material events after the balance sheet date requiring disclosure.

28 Controlling party

The Company is a subsidiary undertaking of BAE Systems Enterprises Limited and the ultimate controlling party is BAE Systems plc, which is both the smallest and largest parent company preparing Group Financial Statements. Both companies are incorporated in the United Kingdom and registered in England and Wales.

The consolidated Financial Statements of BAE Systems plc are available to the public and may be obtained from its registered address:

6 Carlton Gardens London SW1Y 5AD
