### **Notes to the abbreviated financial statements for the year ended 31 May 2013**

#### **1. Accounting policies**

##### **1.1. Accounting convention**

The accounts are prepared under the historical cost convention modified to include the revaluation of certain fixed assets and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

##### **1.2. Turnover**

Turnover represents the total invoice value, excluding value added tax, of sales made during the year and derives from the provision of goods falling within the company's ordinary activities

##### **1.3. Tangible fixed assets and depreciation**

Depreciation is provided at rates calculated to write off the cost or valuation less residual value of each asset over its expected useful life, as follows

Plant and machinery	-	25% reducing balance
Fixtures and fittings	-	20% reducing balance
Computer equipment	-	20% reducing balance

##### **1.4. Investment properties**

In accordance with SSAP19 investment properties are revalued annually and the aggregate surplus or deficit transferred to the revaluation reserve. No depreciation is provided in respect of freehold properties.

The Companies Act 2006 requires all properties to be depreciated. However this requirement conflicts with the generally accepted accounting principle set out in SSAP19. The directors consider that because these properties are not held for consumption but for their investment potential, to depreciate them would not give a true and fair view. Therefore, it is necessary to adopt SSAP19 in order to give a true and fair view.

If this departure from the Act had not been made, the profit for the financial year would have been reduced by the depreciation. However the amount of depreciation cannot be reasonably quantified because depreciation is only one of many factors reflected in the annual valuation and the amount which might otherwise have been shown cannot be separately identified or quantified.

### 1.5. Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax, with the following exceptions.

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold,

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date
