# **NOTES TO THE ACCOUNTS** FOR THE YEAR ENDED 31 MARCH 2018

#### 1. ACCOUNTING POLICIES

#### 1a. Basis Of Accounting

The accounts have been prepared under the historical cost convention.

The accounts have been prepared in accordance with FRS102 - The Financial Reporting Standard applicable in the UK and Republic of Ireland and the Companies Act 2006.

## 1b. Fixed Assets and Depreciation

Fixed assets are shown at historical cost.

Depreciation is provided, after taking account of any grants receivable, at the following annual rates in order to write off each asset over its estimated useful life.

Leasehold Improvements straight line10%

reducing balance12.5% Fixtures And Fittings

and 25%%

reducing balance12.5% Equipment

and 33.33% straight line

Motor Cars reducing balance25%

#### 1c Stocks

Stocks are stated at the lower of cost and estimated selling price less costs to complete and sell (net realisable value). Costs, which comprise direct production costs, are based on the method most appropriate to the type of inventory class, but usually on a first-in-first-out basis. Overheads are charged to profit or loss as incurred. Net realisable value is based on the estimated selling price less any estimated completion or selling costs.

When stocks are sold, the carrying amount of those stocks is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of stocks to net realisable value and all losses of stocks are recognised as an expense in the period in which the write-down or loss occurs. The amount of any reversal of any write-down of stocks is recognised as a reduction in the amount of stocks recognised as an expense in the period in which the reversal occurs.

#### 1d. Pension Costs

The company operates a defined contribution pension scheme. The pension charge represents the amounts payable by the company to the fund in respect of the year.

## 1e. Leasing Commitments

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible fixed assets. Assets acquired under finance leases are depreciated over the shorter of the lease term and their useful lives. Assets acquired under hire purchase contracts are depreciated over their useful lives. Finance leases are those where substantially all of the benefits and risks of ownership are assumed by the company. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period.

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged to profit and loss account on a straight line basis.

## 1f. Turnover

Turnover represents the amounts (excluding value added tax and trade discounts) derived from the provision of goods to customers during the year.
