Sladen Bereavement Ltd
Company Limited by Guarantee
Notes to the Financial Statements

Year ended 31 May 2019

1. General information

The company is a private company limited by guarantee, registered in England and Wales. The address of the registered office is 5 The Quadrant, Coventry, CV1 2EL.

2. Statement of compliance

These financial statements have been prepared in compliance with Section 1A of FRS 102, 'The Financial Reporting Standard applicable in the UK and the Republic of Ireland'.

3. Accounting policies

Basis of preparation

The financial statements have been prepared on the historical cost basis, as modified by the revaluation of certain financial assets and liabilities and investment properties measured at fair value through profit or loss.

The financial statements are prepared in sterling, which is the functional currency of the entity.

Financial instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities. Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability. Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity. Compound instruments Compound instruments comprise both a liability and an equity component. At date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar debt instrument. The liability component is accounted for as a financial liability. The residual is the difference between the net proceeds of issue and the liability component (at time of issue). The residual is the equity component, which is accounted for as an equity instrument. The interest expense on the liability component is calculated applying the effective interest rate for the liability component of the instrument. The difference between this amount and any repayments is added to the carrying amount of the liability in the balance sheet.

4. Company limited by guarantee

The company is private and limited by guarantee. There is no issued share capital.
