S R Green - Director

**Notes to the Abbreviated Accounts  
for the Period 5 March 2015 to 31 December 2015**

---

**1. ACCOUNTING POLICIES**

**Basis of preparing the financial statements**

These accounts have been prepared in line with the FRSSE 2015.

**Going concern**

The directors believe that the trade in the current year is sustainable into the foreseeable future and that the company will maintain its ability to meet its liabilities as and when they fall due.

**Turnover**

Turnover represents net invoiced sales of goods, excluding value added tax.

The turnover shown in the profit and loss account represents amounts invoiced during the period, exclusive of Value Added Tax.

Turnover is recognised when goods and services are physically delivered to the customer.

Delivered goods/ services not invoiced at the year end are included in accrued income. Invoiced goods and services are included in debtors. Where customers pay in advance for goods and services, the amount is recorded as deferred income until the goods and services have been delivered.

**Tangible fixed assets**

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Computer equipment                      -    33% on cost

All fixed assets are initially recorded at the lower of cost and net realisable value, less accumulated depreciation and less amounts recognised in respect of impairment.

**Financial instruments**

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities.

Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability.

Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity.

**Compound instruments**

Compound instruments comprise both a liability and an equity component. At date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar debt instrument. The liability component is accounted for as a financial liability.

The residual is the difference between the net proceeds of issue and the liability component (at time of issue). The residual is the equity component, which is accounted for as an equity instrument.

The interest expense on the liability component is calculated applying the effective interest rate for the liability component of the instrument. The difference between this amount and any repayments is added to the carrying amount of the liability in the balance sheet.
